

JOB DESCRIPTION

Position	Software Development Engineer in Test (SDET)
	Full-time
Direct Report to	Head of Development
Incumbent	vacant
Date	immediately

Job Summary

We are looking for an SDET with experience of .NET frameworks, development and testing to join our small development team in Zug, Switzerland. Ideally, you have 2-3 years hands-on testing experience, preferably in small or medium sized companies. You should also have experience of software development. The role is line-managed by the Head of Development, with priorities set by the CEO, CTO and project-specific stakeholders.

Education and Experience

Requirements

- NET Development with C# and PowerShell (F# bonus)
- Participation in agile development projects
- Testing of backend, desktop and web applications
- Knowledge of SQL and SQL Server databases
- Familiar with Visual Studio, Team Foundation Server, Git
- Appreciation of continuous DevOps
- Team player
- Attention to detail
- Multitasking; handle interruption from business users
- Effective communicator to non-technical colleagues
- Fluent English, both written and spoken

Responsibilities

- Maintain legacy code (Java, C#, VBA, SQL); bug fixing and improvements
- Develop testing solutions, write F# test code
- Automate application testing activities
- Create technical documentation
- Assist IT Support with PowerShell scripts
- Provide support to internal business users
- Learn functional programming (F#)

You can expect:

- Working in the commodity trading sector
- Team spirit and team work
- Opportunity to learn new technologies
